Ecoren® T

Econazole Nitrate &
Triamcinolone Acetonide

Description

Ecoren® T cream is a combined preparation of Econazole Nitrate and Triamcinolone Acetonide. Econazole is an imidazole antifungal agent. It is a broad spectrum antimycotic preparation with anti-inflammatory, antipruritic and anti-allergic effects.

Indications

Ecoren® T cream is indicated for the treatment of steroid-responsive inflammatory dermatomycoses with Econazole sensitive mycotic and/or bacterial superinfections.

Dosage and Administration

Ecoren® T cream should be applied to the affected skin area in the morning and in the evening and rub in gently.

Do not use occlusive dressing. Like with other steroidal preparations, the treatment with **Ecoren® T** cream should, if possible, be limited to 3-4 weeks.

Use in pregnancy and lactation

There is no information of any abnormality or adverse event in neonates while **Ecoren® T** cream had been used during pregnancy. As the systemic absorption of Econazole Nitrate cream is extremely low after topical use, excretion in breast is likely to be negligible. So it can be used topically/vaginally during lactation if needed.

Side effects

Rarely transient and mild irritation, itching & redness may occur immediately after application. Econazole has minimal allergic effect. It is well tolerated, even by delicate skin. Local irritations are not likely to occur, except in rare case, e.g., in eczematous skin areas. In such cases, antieczematous treatment is recommended for several days before therapy with Econazole is initiated.

Contraindications

Econazole Nitrate and Triamcinolone Acetonide combination is contraindicated in patients with known hypersensitivity to any component of the formulation. Topical corticosteroids preparations are contra-indicated in the treatment of herpes simplex, vaccine or varicella.

Precautions

Hypersensitivity has rarely been recorded. If something like this occurs, administration of this product should be discontinued. The infected area should be kept clean and dry during treatment.

Warning

Avoid prolonged applications to the skin and to the face.

Pharmaceutical Precaution

Store in cool, dry place.

Presentation

Ecoren[®] T cream: White, non staining, smooth cream containing Econazole Nitrate BP 1% and Triamcinolone Acetonide BP 0.1%.

Package quantities

Ecoren[®] T cream: Tubes of 10g
